

Company Policy

The management sets the company's policy and long-term planning based on customer- and environment-oriented principles, including energy efficiency.

This results in the following guidelines:

Environmental Policy

We respect our environment: maintaining and saving natural resources is our goal.

We ensure compliance with binding obligations by using "eco compliance" and "Umwelt online" as well as by actively training our employees.

We plan our use of raw materials as well as our production and packaging processes that recycling only generates technically and economically unavoidable waste and emissions

By continually optimising our formulae and production processes, we reduce energy and chemical outputs and thus spare natural resources.

We are committed to protecting the environment and avoiding environmental impacts.

Our management are committed to the continual improvement of our environmental management system with the goal of improving environmental performance.

The evaluation of environmental aspects is renewed every year. Sewage, solvent emissions, hazardous waste, noise and soil hazards are under permanent consideration.

Safety Policy

Occupational health and safety

We protect the lives and health of our employees by a safe and ergonomic work environment.

We develop safety measures upon identifying and assessing hazards, burdens and risks. We advocate for the avoidance of accidents at work with preventative measures and programmes.
